1. Grass on sand base erodes in dry weather. Where possible, pilots should keep to grassy areas. Full strip width available.
2. Circuit: RWY 05 — Left hand  RWY 23 — Right hand
3. Park nose in and as close to south boundary as possible to avoid side clearance infringement.
4. Noise abatement — due to the proximity of residents, aircraft movements should be avoided before 0730 LMT.
5. AWIB 130.6 MHz, activated by 4 transmissions.
6. CAUTION:
   - Moderate to severe turbulence and windshear can be expected in S, SE and NW winds.
   - Model aircraft flying may take place at any time, often in the evenings.
   - While pedestrian traffic is prohibited on the airfield, people often ignore the warnings. Pedestrians and dogs may cross or stray onto the airfield at any time, especially during the evening.
   - Vehicles may be on the airfield at various times carrying out routine inspections and grass mowing.

   (continued)
- North edge of the runway strip has a line of eight concrete valve pits 1.5 m in diameter protruding 200 mm above the surface. The runway strip edge is 6 m from the fenceline to avoid the valve pits.
- Aerobatics are often conducted between Shoe Island and Slipper Island.
