

Snap shot of raw data for eastern properties sampled at Moanataiari

East of a line from Moanataiari Street (western properties will receive their data from the end of April)

NB: Please note this data is effectively 'straight from the lab' and maybe altered to account for things like the margin of error from the XRF machine

There are some results still pending

Property	Highest Surface (As)	Highest 500mm (As)	Highest 1000mm (As)	Lowest reading on site (As)	Highest Lead	Highest Antimony	Highest Mercury
